

Helping Oakland County students go places.

Future programmers

Future welder

Future engineers

With **your support**, we can give them the opportunity to succeed. **Become an official sponsor!**

OAKLAND SCHOOLS EDUCATION FOUNDATION PRESENTS

Scholarships for Success

3rd
ANNUAL GALA DINNER

Sponsorship Packet

Scholarships for Success

What: The Third Annual Scholarships for Success Gala Dinner

When: April 18, 2019 / 6 p.m.

Where: Tam O'Shanter Country Club
5051 Orchard Lake Rd.
West Bloomfield Township, MI 48323

Speaker: Steve Hill
Vice President, U.S. Sales and Service
General Motors

Oakland County Students **need our support** to help them succeed.

The Oakland Schools Education Foundation Scholarships for Success Gala Dinner helps students at the Oakland Schools Technical Campuses (OSTC) attend college, trade school or participate in apprenticeships that prepare them for college and careers. These scholarships help ensure students take the next step in education, while fostering a well-trained, talented workforce ready for employment by Oakland County companies.

In 2018, the Scholarships for Success Gala raised \$70,000. \$57,500 dollars in scholarships will be awarded to OSTC students at an awards breakfast on March 13, 2019. The remainder of the funds will be used to create an endowment fund, ensuring OSTC students have access to scholarships well into the future.

These scholarships can be life-changing for Oakland County students.

These scholarships form the link between a top-notch education and good-paying careers for all students, not just a few. We hope you will consider contributing to the third annual Scholarships for Success Gala Dinner by becoming a sponsor or purchasing tickets to the event. We thank you in advance for your commitment to supporting the next generation of computer programmers, welders and engineers. To learn more, contact Andrea Berry at **(248) 209-2434** or **andrea.berry@osedfoundation.org**.

A Spotlight on Some of Last Year's Award Recipients

Tifani Stanciu

CTE Program: Health Sciences
College: Wayne State University
Course of Study: Biology
Home District: Hazel Park Schools

"My plans after high school are to attend a four-year university to study either nursing or biology, and then pursue a master's degree to be a physician assistant. Helping others with selflessness while working alongside brilliant medical workers as a team is a concept that causes my heart to stir. The first step I took toward my career decision was enrolling in the Health cluster at Oakland Schools Technical Campus Southeast in Royal Oak. This simple decision has changed the course of my life. Because of this class I have been able to take a glimpse into different health careers and even work alongside individuals who are working in various pathways in the medical field."

Anthony Campana

CTE Program: Construction Technology
College: Oakland Community College
Course of Study: Construction Management
Home District: Clawson Public Schools

"I have always loved to create and build with tools. I was able to use my skills from athletics and academics and apply these qualities to my construction class while at OSTC. I was able to showcase my leadership, responsibility, work ethic, creativity and teamwork. I would like to continue learning more about the skilled trades and business. My goal is to work my way through the ranks to become a job foreman, job superintendent and a project manager. I am attending Oakland Community College to further my education in construction management."

Leila Mullison

CTE Program: Visual Imaging
College: University of Michigan
Course of Study: Art and Design
Home District: Farmington Public Schools

"Right now, I am in my first year of study at the Stamps School of Art and Design at the University of Michigan. Stamps is a really unique program. There are no specialized majors for students. This open curriculum allows students to explore a wide range of experiences to make them strong applicants for careers in the creative field. This is a wonderful next step from OSTC, where I learned both skills in design theories and software usage, and in the art of applying to jobs. These skills have set me apart from and ahead of my classmates; they have become the basis for my education here. Because I already have the technical skills and experience from OSTC, I am able to focus more on the art and design aspects of my work here at Stamps."
